The JCEAA Directory of Gravestones is a reference document for the internal management and research of a small subset of images which have been archived at JCEAA according to the name identified on the gravestone. This only accounts for a small portion of the total JCEAA images. Some of these images have been posted on <i>Flickr</i> , and can be found in the cemetery set associated with the gravestone. While JCEAA is not conducting genealogical research, these images may be of use to those searching for specific gravesites. An image for each gravestone on this list is in the JCEAA archive.
